Is it really...

- asthma
- *athletically-induced asthma*
- panic attack
- anxiety attack
- depression
- mitral valve prolapse
- an innocent murmur

or is it... HCM?

HCM

HYPERTROPHIC CARDIOMYOPATHY is the leading cause of sudden cardiac arrest in the young.

♥

Early detection & treatment can be the difference between life and death.

"The Great Masquerader"

THE SYMPTOMS OF HCM INCLUDE

- ✓ Shortness of breath
- ✓ Chest pain/pressure
- ✓ Dizziness
- ✓ Fainting or nearly fainting
- ✓ Palpitations
- ✓ Fatigue

AN ECHOCARDIOGRAM, ECG AND EVALUATION BY A CARDIOLOGIST CAN UNMASK THE GREAT MASQUERADER
